

# Feeding chart for rearing calves

## Milk replacers

### HOW TO USE IT

#### FAST PREPARATION

- 1) Slowly pour the carefully measured quantity of ELVOR onto water heated to 45°C.
  - 2) Whisk briskly to obtain a homogeneous mixture.
  - 3) The preparation should be at least at 40°C.
- Use drinking water and clean tools. Close the bag after use.
  - ELVOR is also well adapted for feeding machines.

### FEEDING CHART FEEDING MACHINE

	PERIOD (after colostrum)	DURATION	MEAL L/day	CONCENTRATION g/L meal
NURSER BUCKET	day 1 <sup>st</sup> → 4 <sup>th</sup>		2 x 2	100
	day 5 <sup>th</sup> → 7 <sup>th</sup>		2 x 2.5	100
FEEDING MACHINE	Period 1	7 days	5 to 6	130
	Period 2	7 days	6 to 7	130
	Period 3	14 days	7 to 7	130
	Period 4	35 days	7 to 2.5	130
	Period 5	3 days	2.5 to 0	130

### FEEDING CHART BUCKET

#### 2 MEALS PER DAY

WEEK (after colostrum)	WATER (L per meal)	+ Milk replacer (g / meal)	= Total Meal (L per meal)
1 <sup>st</sup> → 4 <sup>th</sup> day	1,8	200	2
5 <sup>th</sup> → 7 <sup>th</sup> day	2,3	250	2,5
2 <sup>nd</sup> week	2,7	360	3
3 <sup>rd</sup> week	3,2	420	3,5
4 <sup>th</sup> week	3,6	480	4
5 <sup>th</sup> week	3,6	480	4
6 <sup>th</sup> week	3,6	480	4
7 <sup>th</sup> week	3,2	420	3,5
8 <sup>th</sup> week	2,7	360	3
9 <sup>th</sup> week	1,8	240	2
