

Feeding chart for Lambs and Kids

Milk replacers

HOW TO USE IT

FAST PREPARATION

1) Slowly pour the carefully measured quantity of ELVOR onto water heated to 45°C min.

2) Whisk briskly to obtain a homogeneous mixture.

3) The preparation should be at least at 40°C.

· Use drinking water and clean tools. Close the bag after use.

· ELVOR is also well adapted for feeding machines.

FEEDING CHART FOR LAMBS

WEEK (post colostrum)	Number of meal / day	LAMBS	
		Liters of water/meal	Milk replacer in g/meal
W1	3	0,3	60
W2	3	0,4	80
W3	2	0,7	140
W4	2	0,8	160
W5	2	0,8	160
W6	2	0,8	160

The volumes and concentrations must be suited to the weight and breed of the animals concerned, the method or rearing and the milk replacer used.
